

Cochise County Health Department Celebrates ...

Immunization of children is among the most successful and cost-effective public health achievements that have led to the reduction and prevention of vaccine-preventable diseases. To bring focus, improve and promote immunizations throughout the nation and the United States-Mexico border region, the United States-Mexico Border Health Commission (BHC) is partnering with the Border Binational Health Program of the Cochise County Health Department, the Centers for Disease Control and Prevention (CDC) and the Pan American Health Organization (PAHO) to celebrate National Infant Immunization Week and Vaccination Week in the Americas (NIIW/VVA) from April 25-May 2, 2009.

The Cochise County Immunization Program's primary mission is to provide complete immunization services for children aged 0 to 18 years. We offer all childhood vaccinations **FREE** of charge through the Federal Vaccines for Children Program. In addition we strive to promote vaccination throughout their lifespan by offering a variety of Adult Vaccines at a reasonable cost.

NATIONAL INFANT IMMUNIZATION WEEK AND VACCINATION WEEK IN THE AMERICAS

The Vaccines for Children Program at all health department locations now requires clients to make an appointment for their child's/children's vaccination needs, at least 1 week in advance.

Please call your local health department office at the numbers listed below to schedule an appointment or visit our website: <http://cochise.az.gov>, and click on the health department page for more information.
